Expressions: Abstract Syntax

$$X = \{\mathtt{x}, \mathtt{y}, \mathtt{z}, \dots\}$$
 — variables

$$\otimes = \{\texttt{+, -, *, /, \%, <, <=, >, >=, ==, !=, \&\&, ||} - \text{binary operators}$$

$$\mathcal{E} = \mathbb{Z} \mid X \mid \mathcal{E} \otimes \mathcal{E}$$

Big-Step Operational Semantics (Non-Strict)

 $s:X\to\mathbb{Z}$ — partial function from variables to integers (state)

$$s \stackrel{\mathbf{X}}{\Rightarrow} s \, \mathbf{x}, \, \mathbf{x} \in X$$
 [VAR]

$$s \stackrel{\mathcal{Z}}{\Rightarrow} z, \ z \in \mathbb{Z}$$
 [Const]

$$\frac{s \overset{A}{\Longrightarrow} a}{s \overset{A \otimes B}{\Longrightarrow} a}, \quad (\otimes = "||" \land a = 1) \quad \lor \\ (\otimes = "\&\&" \land a = 0) \quad [Binop_Left]$$

$$\frac{s \xrightarrow{A} a, s \xrightarrow{B} b}{s \xrightarrow{A \otimes B} a \oplus b}, \quad (\otimes \neq "||" \lor a \neq 1) \qquad \land \qquad [BINOP]$$

$$\begin{array}{|c|c|c|} \hline \otimes & a \oplus b \\ \hline + & a+b \\ - & a-b \\ * & a \times b \\ / & a/b, b \neq 0 \\ \% & a \mod b, b \neq 0 \\ \leqslant & \begin{cases} 1 & , & a \leq b \\ 0 & , & a > b \end{cases} \\ \leqslant & \begin{cases} 1 & , & a \leq b \\ 0 & , & a > b \end{cases} \\ 0 & , & a \leq b \end{cases} \\ > = & \begin{cases} 1 & , & a \leq b \\ 0 & , & a \leq b \end{cases} \\ > = & \begin{cases} 1 & , & a \leq b \\ 0 & , & a \leq b \end{cases} \\ 0 & , & a \leq b \end{cases} \\ = & \begin{cases} 1 & , & a \geq b \\ 0 & , & a \leq b \end{cases} \\ 1 & , & a = b \\ 0 & , & a \neq b \end{cases} \\ \vdots \\ \begin{cases} 1 & , & a \neq b \\ 0 & , & a = b \end{cases} \\ \frac{1}{a} \vee \overline{b} \\ \vdots \\ \frac{1}{a} \wedge \overline{b} \end{aligned}$$

$$\overline{x} = \left\{ \begin{array}{ll} true & , & x = 1 \\ false & , & x = 0 \end{array} \right.$$

Semantic Function

$$\llbracket \bullet \rrbracket : \mathcal{E} \mapsto (X \to \mathbb{Z}) \to \mathbb{Z}$$

$$\llbracket E \rrbracket \ s = z \iff s \stackrel{E}{\Longrightarrow} z$$
